

Norwalk 17-22 October 1012

Each October I house and pet sit while my daughter and son-in-law take a vacation trip. While there I layout the portable station on the kitchen counter, pass a wire out the window, across the porch and out to a small tree. It is 11feet up at the near end, 12 feet at the far end, and sags to about 9 feet in the middle. Not the best setup but adequate for a few Q's, and functions as an NVIS antenna. This year I used the ATS4 and MTR, a new rig from KD1JV. The wire was the 84 footer, my go to wire these days. Many of the 49 contacts were NY QSO party contacts, 20M was the best band as usual.
