

QRP AFIELD 14 September 2012

This was my first serious attempt in the annual Sprint sponsored by the NJQRP Club. Pioneer Ridge was the location again. The rig was the ATS4, the antenna was an 84 ft wire nearly vertical in the giant Oak tree at the right with 3-30 ft radials, a ZM-2 tuner and LiFePO4 battery power. A buck/boost regulator was placed between the battery and the rig, fixing the rig's voltage at 12V. It was a good outing with very Fall nice weather and 42 contacts.
