

Pioneer Ridge Portable Ops ... 6 October 2006

This was a Polar Bear outing, and I was operating solo near the Nature Center, just East of the parking lot. It was a fine fall day and I didn't get many Polar Bear point or contacts, so I didn't submit my meager log. The antenna was a 60 ft end fed wire only about 15 feet up with 1 radial. Not a very good portable QRP set up. The park ranger came by for a short visit and to see what I was doing. He was ok with a ham playing radio in his park. The Rig was my ATS3. It is mounted in an Altoids and puts out ~3 watts. www.wa0itp.com/ats3.html This was my first portable operation at Pioneer Ridge County Park, and my only one in 2006.
